Experience

Vocational

- April. **Head of Automatic Speech Recognition, Sonos, Paris**
2024–present Owing all aspects of ASR for Sonos Voice Control, from research to production.
- Delivering state-of-the-art speech recognition models for the future generation of Sonos Voice Control, tailored to the Sonos ecosystem, and fit for embedded inference as a safeguard to user privacy and scale.
- Project leadership: owner of the research roadmaps, large-scale evaluation procedures, cross-functional collaboration with product and platform teams, resources and budget tracking
 - People leadership & talent management: building, growing and supporting technical teams from the ground up
 - Strategic initiative: leader of Sonos' Fairness for speech technologies initiative (at the research [1] and product design level)
- Nov. **Head of Machine Learning Research, Sonos, Paris**
2019–present Owing the scientific aspect of Sonos Voice Control's Research & Development activity.
- Promoting a fruitful and ambitious scientific research environment in the machine learning team that boosts and supports our production goals: building a fully private voice control solution on Sonos speakers, shipped in production in May 2022 to millions of users [2].
- Technical leadership: large-scale ML evaluation, embedded speech to text, fairness, language modeling, speaker identification [3], directness classification
 - People leadership & talent management: co-designed our technical and behavioral interview process (hired around 15 team members), driving continuous learning initiatives for ML research (R&D reporting with peer review cycles, internal workshops, scientific conference attendance)
 - AI/ML education for cross-functional partners: product and platform teams, executive leadership, external stakeholders (e.g. privacy NGOs, US Patent office, tech journalists) on key areas like privacy-preserving machine learning, LLMs and generative AI.
- Aug. – Nov. **Director of Machine Learning Research, Snips, Paris**
2019 Leading the long-term research explorations. Snips was acquired by Sonos in November 2019 to build their privacy-first voice assistant for music control.
- 2017–2019 **Senior Machine Learning Scientist, Snips, Paris**
Developing spoken language understanding solutions on small devices typical of IoT applications. Designing embedded, private-by-design systems with performance on par with cloud-based commercial solutions. Focusing on natural language understanding, wake word detection. Leading the scientific publication efforts [4, 5, 6, 7, 8, 9], with 1,400+ citations to date. Released several open evaluation datasets for spoken language understanding and keyword spotting that have now become standard benchmarks in the field. Filed 3 patents.

Miscellaneous

- April 2024 **Leadership Training, The Leadership Consortium**
Selected by Sonos for to attend the TLC Leaders Program, a curriculum delivered by hand-picked Harvard Business School faculty with personal coaching to accelerate leadership impact.
- Sept. 2022 **Special session lead organizer, Interspeech 2022 conference**
Proposed and co-organized the Special session Inclusive and Fair Speech Technologies to discuss biases, propose mitigation methods, and increase academic and industry collaborations on the fairness of speech systems. 9 accepted main track submissions.

May 2022 **Spokesperson**, *Sonos Voice Control launch*, NYC, USA

Technical spokesperson for the public launch of Sonos Voice Control. Gave interviews to several tech journalists in the public event Sonos organized in the US.

2019 **Invited AI expert**, *Council of Europe*

Educating on AI fairness as an AI expert, invited by the Council of Europe. Focus on gender equality implications of AI. Gender Mainstreaming Team meeting (Strasbourg, June 2019) and Committee of Equality and Non Discrimination (Paris, September 2019).

2018–2020 **Executive board member**, *Réseau Recherche et Innovation en Audiovisuel et Multimédia (RIAM)*, Centre National du Cinéma et de l'image animée

Sitting at the board of the *CNC-RIAM* as an Artificial Intelligence specialist. RIAM provides financial grants to innovative R&D projects in production, processing, distribution, and publication of images and audio. It is a partnership between CNC and BPI France.

Jan.–March **Research Intern**, *Institut Curie*, Paris

2013 Working on theoretical biophysics: theoretical model & numerical simulations to study the effect of cell migration on morphogenesis in biological tissues in the context of cancer research [14].

Computer skills

- Languages
- Python in production environments.
 - PyTorch
 - git and GitHub for code versioning and reviews

Education

2013–2016 **PhD in Statistical Physics**, *École Normale Supérieure*, Paris

High-dimensional inference with correlated data: statistical modeling of protein sequences beyond structural prediction [10].

Developing global statistical inference methods based on the maximum entropy principle with undirected graphical models and their application to genomic data, in the context of protein structure prediction. Through an extensive study on both artificial and biological data, providing a better interpretation of the central inferred parameters, up to now poorly understood [11]. Introducing a more precise procedure for the inference of generative models, which leads to further improvements on real, finitely sampled data [12, 13]. PhD conducted in the Theoretical Physics lab of ENS, under the supervision of Remi Monasson and was codirected by Martin Weigt from the lab of Computational and Quantitative Biology of Université Pierre & Marie Curie (Paris).

Teaching Assistant for Biophysics at the M.Sc. level at ENS for 2 years.

2011–2013 **M.Sc. in Theoretical Physics**, *École Normale Supérieure*, Paris, *Cum Laude*

International Center for Fundamental Physics, a top-level international program, designed specifically for the best French and international students. Focus on mathematics and statistical physics.

2010–2011 **B.Sc. in Physics**, *École Normale Supérieure*, Paris, *Cum Laude*

Statistical physics, mathematics, astrophysics, condensed matter physics, quantum mechanics.

2006–2009 **Prépa MPSI-MP***, *Lycée Henri IV*, Paris

Intensive scientific training for the challenging “Grandes Écoles” national exams.

Languages

- French Native
English Fluent

Activities and Awards

- Outreach Frequent speaker at technical conferences (learn more on [my personal homepage](#)).
- Award Palmarès des 100 Français qui font l'Intelligence Artificielle by Usine Nouvelle in February 2018, “start-up” section.
- Datathon Member of the winning team at the DAT-ICU Datathon organized the AP-HP, the public organization regrouping all the hospitals of Paris in January 2018 [15].
- Debating Secretary General of the French Debating Association tournament (2013-2015). In charge of organizing the annual tournament involving 24 universities at the national level.
- Sports Running and bike-packing.
